

# Seclira® WSG insecticide

The first non-staining\*, odourless, broad spectrum, general insect control product for indoor and outdoor use.

## Application

Seclira WSG is a non-repellent insecticide specifically formulated not to stain or cause damage to most building surfaces where water applied alone does not stain or cause damage. Seclira WSG can be applied with a handheld or knapsack sprayer, or truck mounted tank sprayer, and will not prevent feeding on gel baits such as Goliath Cockroach Gel and Goliath Liquid Ant Bait. Apply as a surface spray to all areas which require treatments as per the Directions for Use table. Pay particular attention to harbourages, cracks and crevices.

Seclira® WSG represents the most significant innovation in general insecticide technology for over 20 years. Seclira WSG is the industries' first non-staining, odourless, broad spectrum, non-repellent general insect control product for indoor and outdoor use. Seclira WSG, has been formulated into unique Water Soluble Granules, which dissolve totally clear resulting in a non-staining solution which remains in suspension ensuring uniformity and consistency of application.

Seclira WSG is formulated with a novel, non-repellent active ingredient, which provides superior knockdown characteristics and contains BASF Genuine Transfer Effect technology resulting in unmatched performance. Seclira WSG is approved for use both inside and outside and controls a broad spectrum of pests including ants, cockroaches, mosquitos, wasps, bed bugs, spiders and other crawling insects.

## Features

## Benefits

Versatility	Seclira WSG is a broad spectrum non-repellent insecticide that can be used inside and outside to control a range of pests and is compatible with BASF non-repellent insecticides and baiting products providing PCOs with the most versatile treatment and active ingredient rotation strategy available.
No odour, Non-staining*	The unique WSG formulation dissolves clear and remains in suspension providing the first odourless, non-staining formulation available.
Genuine Transfer Effect	Seclira WSG is powered by a novel non-repellent active ingredient developed with BASF Genuine Transfer Effect technology, ensuring superior performance in the most difficult situations.

\*Seclira WSG will not stain surfaces that water alone does not stain. Dirt on surfaces may result in runoff and staining. Where staining is a concern – a test application is recommended.

## Insecticide

SITUATION	PEST	RATE	COMMENTS
Domestic, commercial, industrial and public buildings and facilities (including but not limited to food processing establishments, shops, factories, farm buildings, hotels and backpacker accommodation, ships, trains, aeroplanes, offices, schools, storerooms, hospitals, barracks, private houses and external areas associated with such establishments)	Ants	Non-porous surfaces: 10 g / up to 5L water / 100 m <sup>2</sup>  Porous surfaces: 10 g / up to 10L water / 100 m <sup>2</sup>	Conduct a thorough inspection and apply to known and potential ant harbourages. Where possible locate the nest and spray directly into nest entrances. Apply to all ant trails and areas where ants are foraging
	Cockroaches	Non-porous surfaces: 30 g / up to 5L water / 100 m <sup>2</sup>  Porous surfaces: 30 g / up to 10L water / 100 m <sup>2</sup>	Conduct a thorough inspection and apply to known and potential cockroach harbourages. A barrier application around areas where cockroach infestations may be originating is also suggested.
	Mosquitos	Non-porous surfaces: 20 g / up to 5L water / 100 m <sup>2</sup>  Porous surfaces: 20 g / up to 10L water / 100 m <sup>2</sup>	Spray surfaces where mosquitoes are known to come to rest. Spray walls, awnings, fences in proximity to buildings.
	Wasps	40 g / up to 5L water / 100 m <sup>2</sup>	Apply diluted spray to the point of run-off directly to the nest ensuring thorough and even coverage.
	Bed Bugs	Non-porous surfaces: 40 g / up to 5L water / 100 m <sup>2</sup>  Porous surfaces: 40 g / up to 10L water / 100 m <sup>2</sup>	Apply as a coarse low pressure spray, to the skirting boards, carpet edge, cracks, crevices, in and behind bed heads and bed frames, bedside tables and cupboards. For cracks and crevices, use of pin stream application is recommended.  An IPM approach should be followed for the control of bed bugs.
	Spiders	Non-porous surfaces: 30 g / up to 5L water / 100 m <sup>2</sup>  Porous surfaces: 30 g / up to 10L water / 100 m <sup>2</sup>	Spray spiders, their webbing (web spinning spiders) and areas where spiders may hide directly. It is recommended that any webbing is left in place for a few days after application to optimise efficacy.
	Crawling insects	Non-porous surfaces: 40 g / up to 5L water / 100 m <sup>2</sup>  Porous surfaces: 40 g / up to 10L water / 100 m <sup>2</sup>	Make spot and/or crack and crevice applications into hiding places and entry points. Apply where pests rest, trail and harbour.

## Packaging

Available in 200 gram bottles
