**Rapid Knock Down, Longer Term
Residual For Superior Broad Spectrum
Control Of Household Pests.**

THAT'S THE DUAL POWER OF FURY.

A innovation in broad spectrum household insecticides.

A new longer lasting broad spectrum household insecticide from FMC, Fury 120 SC is specifically formulated to create a superior, longer lasting strength general insecticide that works in two powerful ways to rid your clients of general household pests.

Fury's power and strength comes from a patent protected (60475), optimised formula of alpha-Cypermethrin and bifenthrin. Alpha-Cypermethrin provides Fury's superior knock down power whilst the established strength of bifenthrin ensures a longer residual control period.

Setting a new, higher standard for household pest control in Australia

A bold statement, but one based upon a dynamic chemical combination of bifenthrin (80g/L) & alpha-cypermethrin (40g/L). Combined they empower Fury 120 SC with immediate knockdown and sustained residual coverage... all in one, easy to use and powerful product.

Alpha-cypermethrin is known for its excellent knockdown power or flushing agent for the initial, quick elimination of pests. Bifenthrin provides a long-term residual control.

What it means to you as a pest manager and operator.

A better bottom line for your business. In laboratory tests Fury 120 SC outperformed the current leading brands in fast acting control of ants, cockroaches and spiders.

Fury 120 SC goes further, eradicating flies, mosquitoes, midges, silverfish, fleas, cloths moths, papernest wasps and bed bugs

Fury 120 SC also proved to be more powerful when it came to getting heavy pest infestations under control.

The power of Fury's superior initial knock down will impress your customers.

Use only as directed.

The application of Fury 120 SC must always be carried out by a licensed pest manager and only used as directed.
