

InVite™ Multi-Insect Lure

InVite™ Multi-Insect Lure is a blend of multiple pheromones in a thickened food oil base that protects the pheromone prior to use and provides a more uniform release after application. The oil also functions as a food attractant for a variety of pests which increases the productivity and effectiveness of each dose.

- Contains pheromones for attracting cigarette beetles, red and confused flour beetles, warehouse and khapra beetles, Indian meal moths, almond and Mediterranean flour moths
- Non-toxic, non-pesticidal formula
- Easy to use 6-dose mini-syringe with convenient dosage markings on the tube
- Can be applied to glueboards of any shape or size
