

# SOLAR PROOFING SOLUTIONS

## PREMIUM SOLAR MESH KIT

Quickly secured with tough UV resistant polycarbonate clips

**Solar Mesh** is designed to prevent birds and rodents from nesting under solar arrays. Solar Mesh helps to **protect** electrical wiring and **solar panels from damage** caused by chewing, nesting materials and debris. Solar Mesh is also **great for use in bushfire prone areas**, preventing the build up of leaf litter under solar arrays. Solar Mesh is quickly secured with polycarbonate clips, protecting panels without damage or alteration so as to maintain the panel warranty. Solar Mesh is made from **quality stainless steel wire** welded into 12.5mm squares and coated with PVC, ensuring that Solar Mesh is **resistant to UV degradation and corrosion**. Solar panel clips are made from tough UV stable polycarbonate and corner clips from quality stainless steel.

### Mesh Specifications:

Material: Stainless steel wire - black PVC coated

Mesh diameter: 0.94mm

Roll size: 30m x 20cm

Mesh Size: 12.5mm
