## Efficacy Studies

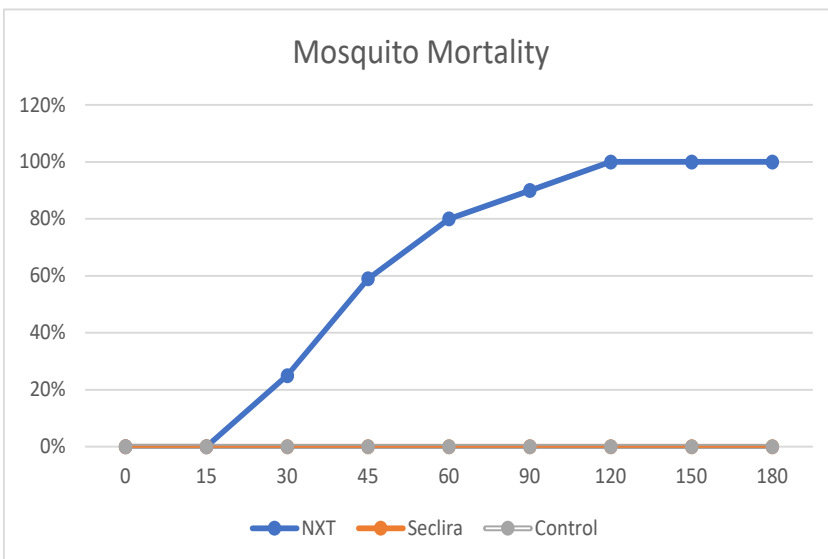

Chart of American cockroach mortality for each treatment over time in minutes

Black house ant mortality for each treatment in minutes

Mosquito mortality for each treatment in minutes

## Why 2 IGRs in D-Fense NXT?

D-Fense® NXT contains 2 IGRs, novaluron and pyriproxyfen. These 2 IGRs help to break the bed bug life cycle and to prohibit the insect from molting properly. When these unique IGRs are combined, they work in a whole new way, causing results not seen with either product alone – a synergistic effect.

## Use Rates

For general surface applications, hold can approx 35cm from the surface being sprayed and apply at a rate of 10 second for 10m<sup>2</sup>.

For spot applications, hold can approx 35cm from the surface being sprayed and apply at a rate of 1 second for 1m<sup>2</sup>.

## Other rates

1m per second for cracks & crevices in light infestations.

1m per second for cracks & crevices in heavy infestations.

## Where to Use

D-Fense® NXT is labelled for use in and around domestic, commercial, industrial, public buildings and transport vehicles - including food processing establishments, shops, factories, ships, offices, schools, storerooms, hospitals, barracks and private houses.
